A Catalytic Conversation

1. Get real
2. Take responsibility

Disruption in the Australian Building Industry

IOT

Priority Focus

1. Smart Production
2. Smart Products
3. Smart Services
4. Smart Business Models

Questions for Your Reflection & Action

Question

In the next 2-5 years...

1. Who thinks their production methods, products, services and business models will be disrupted and their competitiveness threatened?

Question

In the next 2-5 years...

1. Who thinks their production methods, products, services and business models will be disrupted and their competitiveness threatened?
2. Who is prepared for this?

Question

In the next 2-5 years...

1. Who thinks their production methods, products, services and business models will be disrupted and their competitiveness threatened?
2. Who is prepared for this?
3. What is your key takeaway from this?

Question

1. Who thinks that Lean, Six Sigma, Agile, Design Thinking, etc. – all focussed on current Industry Standards is going to play the biggest part in your organisation dealing with disruption and maintaining your competitiveness?

Question

1. Who thinks that Lean, Six Sigma, Agile, Design Thinking, etc. – all focussed on current Industry Standards is going to play the biggest part in your organisation dealing with disruption and maintaining your competitiveness?
2. Who thinks that through embracing new capabilities (tech & business models) you will remain competitive, leverage disruption and generate sustainable value?

...What is your key takeaway from this?

Core capabilities tend to be specialised and value-adding

Core Capabilities

Critical for **locking-in** value and
generating **sustainable** value

Generalised Capabilities

Capabilities that all organisations or sectors require to operate.

E.g.:

- Human resources
- Financial and accounting
- Strategic thinking

Specialised Capabilities

Capabilities specific and specialised to your type of organisation, within your sector.

E.g. (airline):

- Flying
- Route mapping
- Maintenance
- Airline safety

Value-Adding Capabilities

Capabilities that add value over and above sector standard.

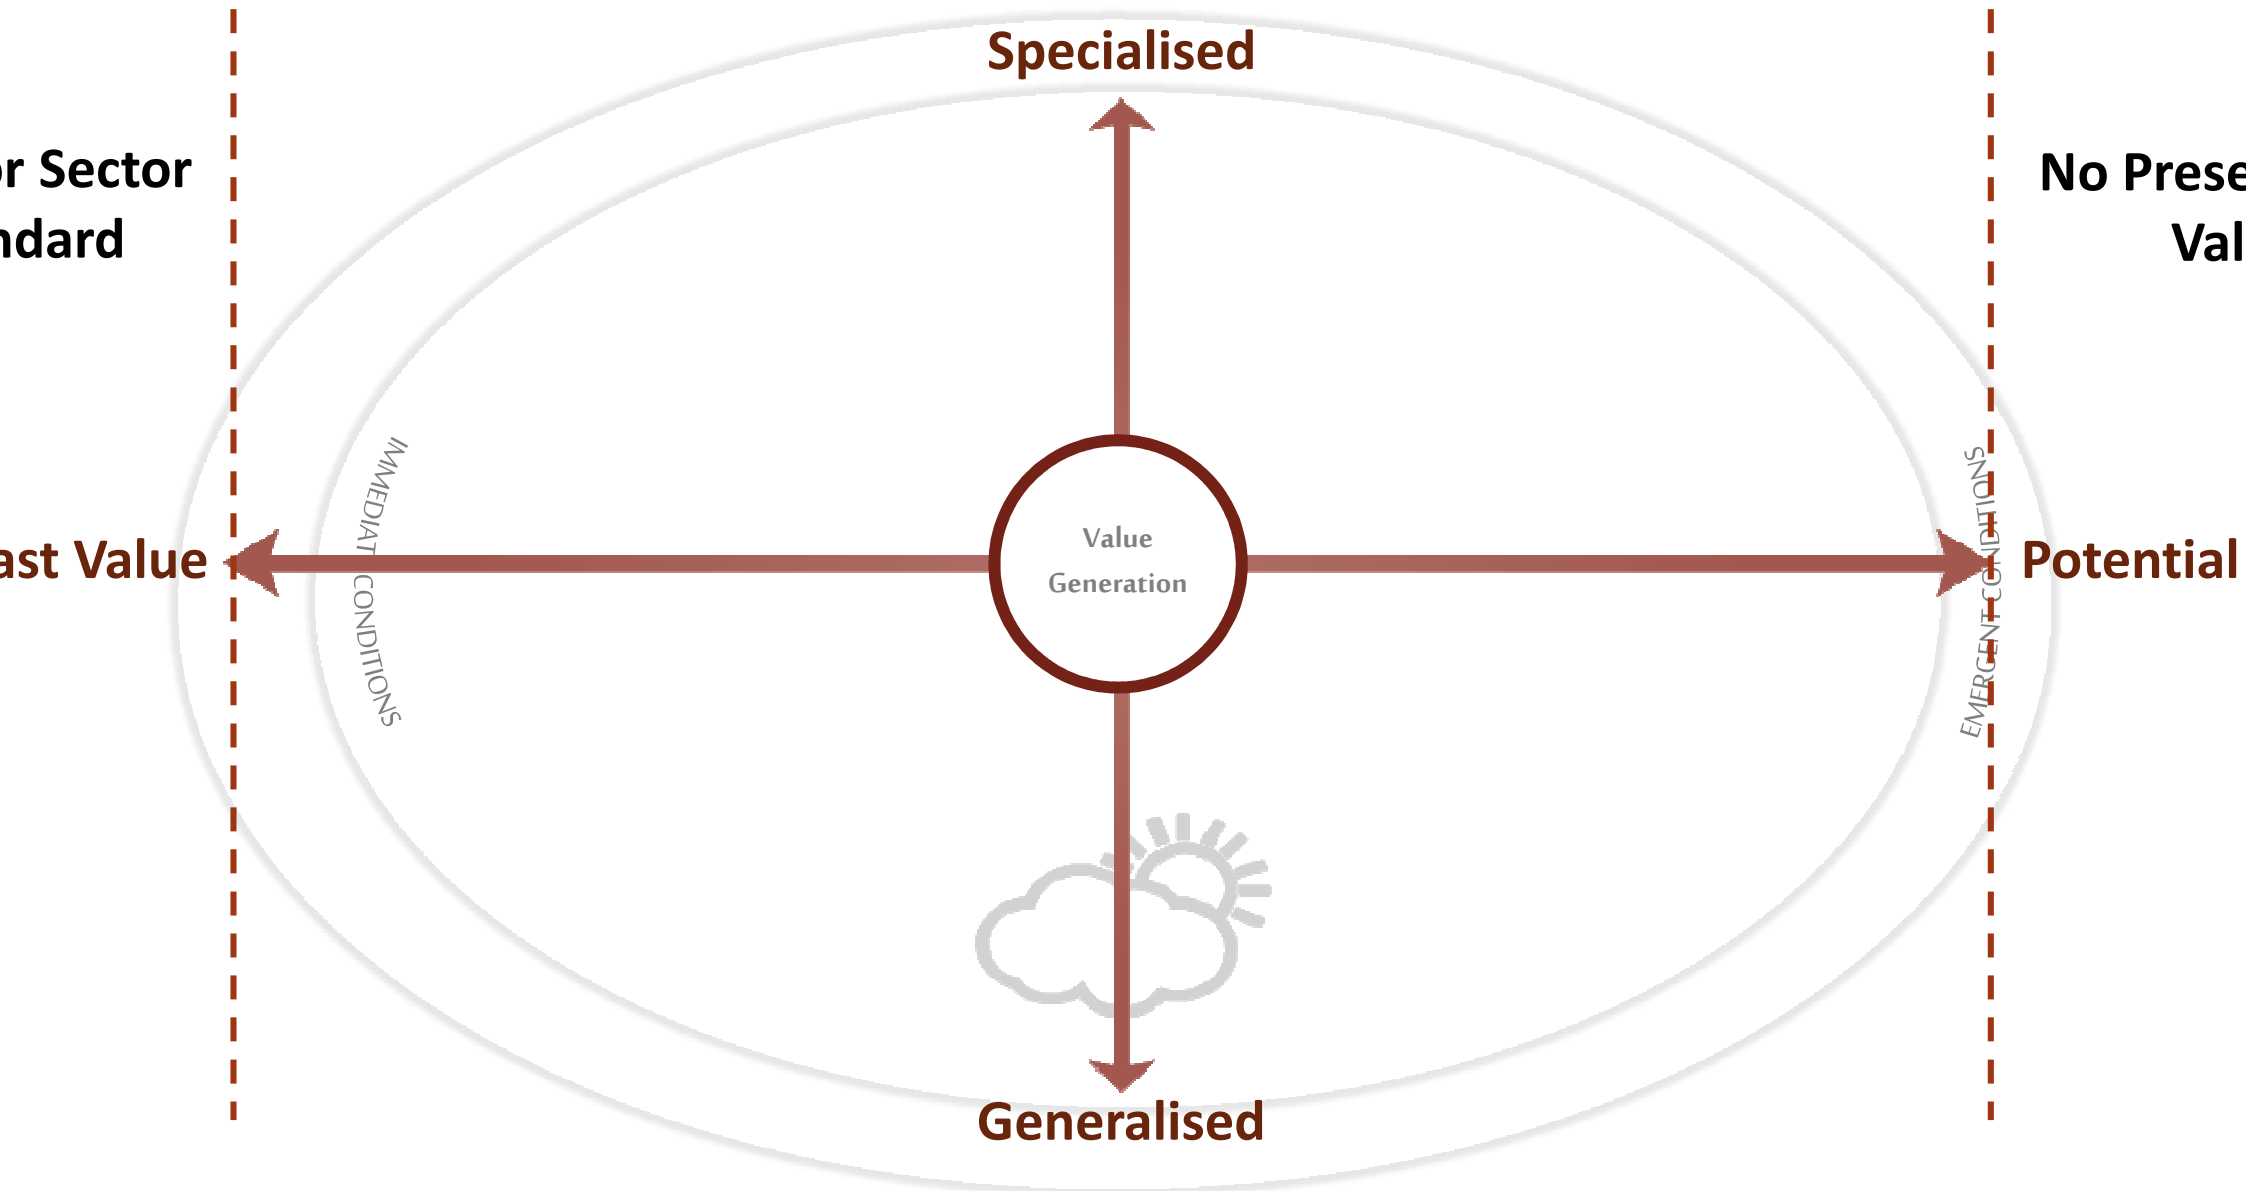

E.g. (airline):

- Business services
- Lay down beds
- In-cabin Wifi
- Extra leg room

Get real

Leverage disruption,
generate sustainable value.

It's not for everyone

BE AWARE...

Managed Adaptive Decline

MAD is adapting to declining conditions in a well-managed way.

Boiling Frog Syndrome

Helma and Louise Effect... looking good...

Thelma and Louise Effect... looking good...

... going nowhere

Diggers, Ditherers and Drongos..

Take
Responsibility

Who is committed to
breaking the mould?

Disruption Ready Organisation: Insights
